

NADCA Certified Air Duct Cleaning

- NIKRO Air Duct Cleaning System
 - System is compact, lightweight, and portable - making it ideal for residential and light commercial work.

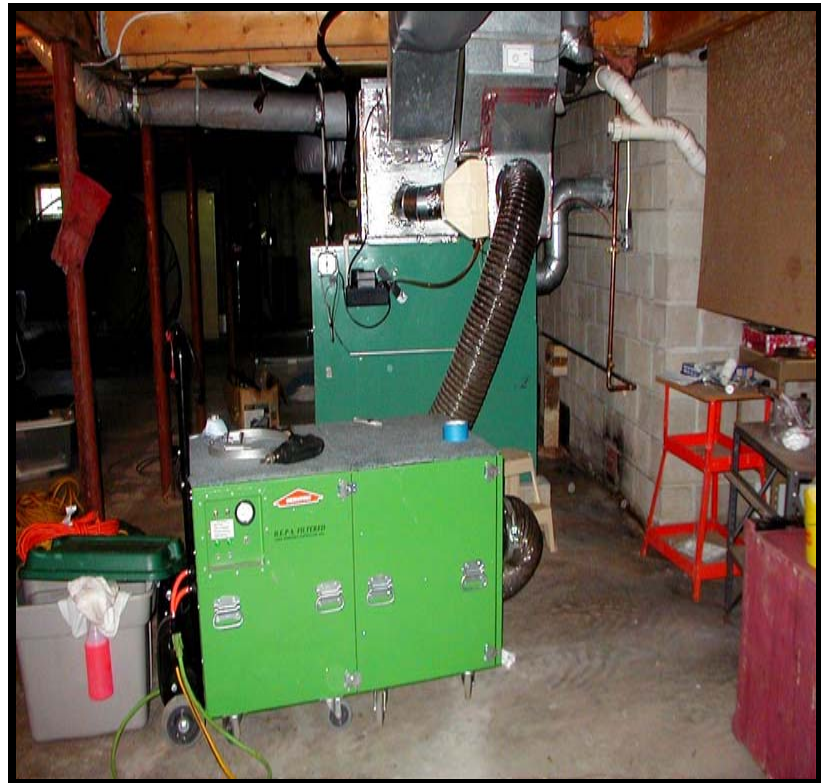

What Contaminates Ductwork?

- **Furnace Malfunctions**
- **Water/Sewer Damage**
- **Mold Damage**
- **Construction/Demolition**

How it works!

- The machine is attached to the heating/cooling system and provides continuous air movement during cleaning. The HEPA (High Efficiency Particulate Air) filter retains 99.97% of all particles including molds, pollen, and most bacteria

How it works!

- At the same time, air whips and brushes powered by a 150 psi compressor are sent into the ductwork to loosen debris, soot, mold, dirt, pet dander, and pollen.

Before & After
